

# Native Prairie Plant-a-thon

**Date: November 9, 2013**

**Time: 8:00a.m.– 12:00p.m.**

**Volunteers are needed to plant 2,500 native coastal prairie grasses and forbs.** This event will help the park continue the restoration of 400 acres from farmland to native prairie habitat and reestablish the diverse wildlife that it once had. Located in northeast Harris County, **Sheldon Lake Environmental Learning Center** is visited by thousands of children and adults each year who take guided nature walks, study ecosystems, go fishing, experience pond ecology, and see alternative energy in action. Restoring this prairie will enhance the educational programs at the Learning Center. We invite you to be a part of the ongoing restoration work on the Sheldon Prairie.

- *Groups should have each individual or family register separately.*
- *100 volunteers are needed for this event. If you need to cancel please notify us as soon as possible so someone else can fill your spot.*

**Phone: 281-456-2800 x230**
